Panel discussion: China's technological future

Note: this event will not be livestreamed. The panel discussion will take place in-person in the Humanity Hub in The Hague

China's emergence as a force to be reckoned with in the digital realm has caused some concern in Western countries, on topics ranging from Chinese

capture semiconductor manufacturing facilities. To what extent are these concerns justified, and what is it we need to know about China's digital technology capabilities to better assess the future of the digital realm? [Join us for a panel conversation with three leading experts in the field, who will shed greater light on these important developments.](#)

Speakers:

Jamie Horsley – The CAC: A Portrait of China's Digital Regulator

Jamie Horsley is a Visiting Lecturer in Law and Senior Fellow of the Paul Tsai China Center at Yale Law School. Her project work and research revolve primarily around issues of administrative law, governance and regulatory reform, including promoting government transparency, public participation and government accountability.

Hunter Dorwart – China and Cross-Border Data Flows

Hunter Dorwart is a Policy Counsel for the Future of Privacy Forum's Global Privacy team, where he analyzes new bills, laws and regulatory actions around the world with an impact on the digital economy, personal data and data flows. He has previously worked with the Federal Communications Commission (FCC) on global digital development issues as well as the Telecommunications Industry Association (TIA), a leading standard setting organization for the information communication technology industry.

John Lee – China & Semiconductor Industry

John is the director of East West Future. His analysis is informed by a sophisticated understanding of the political, business and security environments in the EU, Australia and East-Southeast Asia. His research mostly focuses on China's semiconductor-related industries and their global relations, China's cyberspace governance and data regulatory regime, and future telecommunications networks and the Internet of Things.

The event is moderated by [Rogier Creemers](#), Assistant Professor in Modern Chinese Studies at Leiden University and researcher at LeidenAsiaCentre, where he directs a [project on China and global cybersecurity](#). This research projects aims to increase the levels of knowledge and awareness of the various challenges China's cyber policy poses.

The DigiChina Project

In line with the LeidenAsiaCentre project [China's Role in Cyber Security](#), LAC-researcher Rogier Creemers and the Stanford Cyber Policy Center have set up the DigiChina project. The project is a collaborative effort to understand China's technology policy developments, primarily through translating and analyzing Chinese-language sources.

DigiChina, based in Stanford, USA, has published translations of primary sources, contextual explanation, and analysis on China's technology policy landscape, covering topics including the Cybersecurity Law regime, data governance, artificial intelligence, and China's official push for greater technological independence.

Interview with Frank Pieke on the report "Chinese Influence and Networks among Firms and Business Elites in the Netherlands"

Recently, dr. Frank N. Pieke was interviewed by NPO Radio 1 on the report: ["Chinese Influence and Networks among Firms and Business Elites in the Netherlands."](#)

The LeidenAsiaCentre has published the research report "Chinese Influence and Networks among Firms and Business Elites in the Netherlands" by Professor Frank N. Pieke (Leiden University/ LeidenAsiaCentre) and Dr. Naná De Graaff (Free University Amsterdam).

The presentation of the report was Tuesday June 28, at Spaansche Hof in The Hague, organised by the [Netherlands China Business Council](#).

The report analyses the connections of Chinese business elites with Dutch and other international business elites, and how these interactions affect the activities of Chinese companies in the Netherlands. Furthermore, the report examines how the Chinese Communist Party (CCP) organises itself abroad

The report is a research project of the LeidenAsiaCentre on behalf of the China Knowledge Network of the Government of the Netherlands.
